OTP Terminalkrimpemaskine Stansedele - Tilpasselig U-Die Form

Model No. JW-AP34

SPECIFICATIONS

Form-type	OTP horisontal
Vægt	5KG
Slag	30 mm

Tilpassede OTP terminalkrimpningsmaskiner Stansedele U-die- og hydrauliske presseforme Form til krimpemaskine, terminalkrimpemaskine, hydrauliske presseforme, stansedele U-die-forme
til krimpemaskine engros terminalapplikator løs kontinuerlig forskellige terminalmaskiner og kobberremsmaskiner kan bruges til at presse formen efter kundens ønsker. Stabil formydelse, høj præcision og en overkommelig pris.
Funktionsform til en krympemaskine
Form-type OTP horisontal
vægt 5KG
slag 30 mm

HOW TO MATCH THE MOLD BLADE OF THE TRANSVERSE TERMINAL

Transverse terminal 01

Transverse terminal : the axis direction of the terminal and the connecting terminal with an angle of 90 degrees

02 Transverse mold

The OTP transverse mold is the most commonly used mold in the wire harness processing industry. Its advantage lies in the ease of feeding and debugging. And the number of blades is small, easy to install. Equipped with two scale knobs to easily adjust the blade.

A TOTAL OF FOUR BLADES 03

Different terminals require different blades to crimp the terminals

Complete equipment display ▶

A pair of blades is provided on the mold, if you need more blades, you need to buy them separately

1.5Ton terminal machine

HOW TO MATCH THE MOLD BLADE OF
THE STRAIGHT SHAPE TERMINAL
STRAIGHT SHAPE TERMINAL
01
Straight terminal: a terminal with an angle of 0 degrees from the axial direction of the terminal.
02
STRAIGHT MOLD
The OTP straight mold knife set is composed of more than six blades. Four of them are conventional blades for riveting core wires and outer covers.
A TOTAL OF FOUR BLADES
03
Different terminals require different blades to crimp the terminals

A pair of blades is provided on the mold, if you need more blades, you need to buy them separately
1.5Ton terminal machine
straight mold

HOW TO MATCH THE MOLD BLADE OF
THE SINGLE GRAIN MOULD
SINGLE TERMINAL
01
Single terminal: single terminal without connecting tape
02
SINGLE GRAIN MOULD
OTP single-grain molds are commonly used for crimping of single-grain pre-insulated terminals, ground terminals, spring-loaded terminals and other terminals. Installation and commissioning are extremely simple. Especially suitable for novice operations.
A TOTAL FO TWO BLADES
03
Different terminals require different blades to crimp the terminals

1.5Ton terminal machine
Single grain mould

HOW TO MATCH THE MOLD BLADE OF THE SPECIAL TERMINAL

01 SPECIAL TERMINAL

Such as flag-shaped terminals, double-material terminals, terminals with material on the head of the terminal, etc.

02 CUSTOMIZED MOLD

After receiving the sample terminal, it is specially customized according to the terminal. 3-5 working days delivery

03 CUSTOM BLADE

Different terminals require different blades to crimp the terminals
